NOTES ON CONTRIBUTORS

Kirsti Andersen is an Associate Professor of History of Mathematics, Department of History of Science, University of Aarhus. She is currently working on the history of the theory of perspective from Alberti to Lambert.

H. Floris Cohen is Professor of Social History of Science at the University of Twente. He published Quantifying Music, and is on the verge of finishing The Banquet of Truth. A Historiographical Inquiry into Nature and Causes of the 17th Century Scientific Revolution.

Harold J. Cook is an Associate Professor in the Departments of the History of Medicine and History of Science at the University of Wisconsin-Madison. He is currently working on extending his understanding of the scientific revolution in England to the Netherlands, with a special interest in the importance of medicine and natural history to the scientific revolution.

Marta Fehér is head of the Department of Philosophy at the Technical University in Budapest, where she teaches philosophy and history of science.

Marian Fournier is a staff-member of the National Museum for the History of Science and Medicine ‘Museum Boerhaave’ in Leiden. She is currently finishing a study of seventeenth-century microscopy, which will be published shortly under the title The Fabric of Life.

Dick van Lente teaches the cultural history of industrial societies at Erasmus University in Rotterdam. He is the author of a book on reactions to technological innovations in the Netherlands between 1850 and 1920. He is one of the editors of the project described in this issue. His current research interest is communication technology in the Netherlands during the nineteenth century.

Bert Theunissen teaches the history of biology at the Department of History and Foundations of Mathematics and Science of Utrecht University. He presently studies the development of Dutch (colonial) biology in the period 1860-1940.

Robert P.W. Visser teaches the history of biology at the Department of History and Foundations of Mathematics and Science of Utrecht University and is currently working on the cognitive, social and institutional aspects of Dutch genetics.
